

Synthetic Financial Market Test Memorandum

IMPORTANT: This is a deliberately modified fictional document for testing RAG + SLM contradiction detection. It is not an official RBI or government document and must not be used for real financial decisions.

Document ID: SYN-FIN-TEST-01
Version: 2.0 (adversarial test version)

1. Modified Financial Indicators

Indicator	Modified value	Period
Average daily money market volume	■6.9 lakh crore	FY 2025–26
Commercial paper issuances	■18.2 lakh crore	FY 2025–26
Corporate bond market turnover	■7.8 thousand crore	FY 2025–26
Q4 OMO purchases	■4.15 lakh crore	Q4 FY 2025–26
Q4 OMO purchases through auctions	■3.0 lakh crore	Q4 FY 2025–26

2. Deliberately Incomplete Information

The memorandum discusses quarterly liquidity conditions but does not provide the complete Q3 average daily money market volume. The system should classify this as PARTIAL or UNCERTAIN and should not invent a value.

3. Irrelevant Information

The institution conducted an employee wellness campaign involving 420 participants, three workshops, two feedback sessions, and a 78% attendance rate. These details are unrelated to financial market analysis.

4. Test Questions

- 1. What was the average daily money market volume during FY 2025–26?
- 2. What was the total commercial paper issuance during FY 2025–26?
- 3. How much was spent through Q4 open market operation purchases?
- 4. Does this memorandum agree with the other financial report in the collection?
- 5. Which information is irrelevant to financial market analysis?
- 6. Is the complete Q3 average daily money market volume available?

5. Expected SLM Verification Labels

Situation	Expected action
Values conflict with the original report	CONTRADICTION → retrieve independent evidence
Q3 value is missing	PARTIAL / UNCERTAIN → do not guess
Wellness campaign is retrieved for a finance query	IRRELEVANT → remove
Evidence comes only from this file	Mark as synthetic test evidence

Evaluation note: Keep this document marked as synthetic/adversarial in your metadata. Do not present its altered figures as real-world facts.
